EXTERNAL TRAINING COURSE FROM 2020 TRAINING PLAN

A Health, Safety & Security Training Course:

*Safety Measures and Hazard Control
(Core Issues for Health and Safety)*

From 17/02/2020 To 21/02/2020

Turkey, Istanbul, CVK Taksim Hotel

850 KD (For Participant Note Less Than 7 Participants)

950 KD (For Participant – (3-7) – Participants)

1200 KD (For Participant Less Than 3 Participants)

Description

There is an awful sameness in the causes of incidents and poor safety performance. It is not that there are no standards to follow or that these standards are not totally applicable to the company. The problem lies, on the one hand, to a lack of a robust Safety Management Systems and, on the other, an incomplete Hazard register that defines the methods available to reduce the risks from Hazards and or how to control them. This Safety Measures and Hazard Control training course aims at setting the guidelines and knowledge base required in both the Safety Management Systems and also the control of Hazards that are present in the Process Industry. This training course will feature:

- Responsibilities
- Health and Safety Legislation
- Safety Management Systems
- Common Hazards and Controls
- Occupational Health Hazards

Objectives

By the end of this training course, participants will be able to:

- Understand Safety Management
- Explain the Risk Assessment process
- Analyse workplace hazards
- Identify methods of Hazard Control
- Know the Incident Investigation
- Learn the Fire and Emergency procedures

The Course Content

Day One: Safety Management Foundations

The nature of workplace health and safety
Responsibilities of Employers and Employees
Safety Management Systems (Plan, Do, Check, Act)
OHSAS 18001, ISO 45001, OSHA Guidelines for Safety Management
Improving health and safety performance
A Safety Policy
Inspections & Audits

Day Two: Risk Assessment and Control

Setting Targets - Key Performance indicators
Health and safety risk assessment
General principles for control
Hierarchy of risk reduction
Safe systems of work
Human Error

Day Three: Hazards and Controls

Physical Hazards (Noise, Vibration)
Electricity Hazards
Work Equipment Hazards
Manual Handling Hazards
Workplace Hazards (Temperature, Violence and Bullying, Slips and Trips, Work at Height)
Transport Hazards

Day Four: Incident Investigation, Fire and Emergency Procedures

Incident Investigation
Why investigate Incidents
When to investigate Incidents
Fire safety
Need for Emergency plans
First Aid Provisions

Day Five: Occupational Health (HazCom) & Safety Culture

Chemical Hazards
Occupational exposure limits
Stress
Safety Culture
Review of the Week
Evaluation
